Tab. 1: ALU Test Vectors

11. During the in-lab, you will be implementing the ALU block. As part of the design process, you need to develop an appropriate set of test vectors to verify basic functionality. Complete Table 1 (submit hardcopy or via email) to verify that all 7 ALU operations work as designed. Note that all values are expressed in hexadecimal. You will use this table to test the ALU Verilog code that you will implement during the in-lab (make sure to keep a copy of your submitted answers).
